Confirmation Services Coleman and Blairmore

Candidates and Congregation Impressed With Inspiring Message by Bishop Sherman

The Rt. Rev. L. Ralph Sherman, Bishop of Calgary diocese, on Friday evening, addressed eleven candidates at St. Albans' yesterday evening, and ten at St. Luke's, Blairmore. His address to the candidates was very inspiring, impressing on them the importance of leading Christian lives and to follow as closely as they could the splendid example of the life and teachings of Jesus Christ.

Following the service at Blairmore, a reception was held in the Elks hall, which was attended by members of the congregations in Coleman and Blairmore.

In the afternoon at Coleman the bishop presented the attendance pins to the Junior W.A., which has made a splendid showing during the year under the guiding hand of Mrs. Currie.

During his brief stay in town the Bishop was the dinner guest of Mr. and Mrs. J. A. McLeod.

The Sun-Bath — Shower-Bath Limited

HIGH officials of the Canadian Pacific were much relieved when Dr. Ernest French, the Harley Street specialist, refuted the statement originating in London to the effect that mustard plasters were as beneficial as ultra-violet rays. During a long winter the Company has been engaged in building for use on the Trans-Canada special Solarium-Lounge cars equipped with "view-glass" windows which will admit the most intense sun-rays. It almost came to the question of whether the Company would scrap the new equipment and return plasters to its patrons.

The new cars, designed for the rear end of the limited trains, will be the most magnificently appointed ever to travel on the Canadian.

Given over entirely to the free use of the passenger, the lounge cars, besides the Solarium feature, have the added attraction of bath-rooms for men and women, completely and lavishly

equipped, separate lounge and smoking rooms, a buffet and a large observation room with leather-covered chairs, drawing library, settees. There are, of course, ample writing facilities and a small library.

The sleeping cars designed for this train are also "different". Finishes in brown, a color note which is carried out in the upholstery, curtains and carpets, these cars contain in addition to the usual public space two compartments, a drawing room and eight sections. Each section will be seen from the illustration above, is separated from its neighbour by a heavy head-board, which gives an added degree of privacy to the occupant.

With the locomotive, and complete with every modern comfort and safety appliance and device, the new Trans-Canada trains each represent an investment of well over a million dollars.

What The Council Did "WHY BE GOOD?" IS ORIGINAL STORY

A regular meeting of the town council was held on April 23 Present—Mayor Burns, Councillor, Smith, Moores, Snowdon and Pattinson.

Mah Pay was granted approval of provincial license for the New York Cafe.

The fire chief's report on the story written especially for her, through the glass. One of the officers being called to extinguish "Why Be Good?", which opened on a fire on Fifth street, between H. Friday at the Palace theatre.

C. McBurney's and Frank Graham's residence, was read. The order by Carey Wilson, prominent fire was caused by children playing a author and scenarist, after John he was introduced to the Honorable

McNamee, producer of matches and lighting some McCormick, Moore's pictures told him the type to meet Dominion visitors to the

Third reading was given to of story he intended to film. Wilson Mother Country.

is the amendment of by-laws respecting licensing.

A notice of motion was given by Cr. Smith for the introduction of a starting "Why Be Good?" Miss katchawan, from which last year parking by law. Estimates were Moore had three successive pictures he harvested 5,000 bushels of grain, again before the council, and will three adapted from stage plays, in addition to crop raising he

take up again at a further meeting.

Fines Without Warning Will Be Enforced

Provincial and Town Police Will Bring Offenders for Speeding Before Magistrate

Warnings not having the desired effect, the local offices of the provincial police have issued instructions to summons any person who drives at an excessive speed on the highways and through the towns. Several have already been fined \$15 and costs, and it has had a marked effect on some who drive as if their fate depended on getting somewhere, whereas in most cases their only reason for excessive speed is just a mania or to show off.

Several plate glass windows in town have been broken from stones being thrown up by fast speeding cars, and damage to a number of cars has resulted on the highway. Sergeant Jones and his men are out to enforce the law, and they will have the support of the great majority in their efforts.

Agitation has already been made that persons found guilty of a breach of traffic regulations have

that the latter's parents, Mr. and Mrs. J. L. Lonsbury.

Two airplanes, presumably from

High River forestry station, were

TO READJUST CAPITALIZATION OF THE C. N. R.

Ottawa.—For the first time since the creation of the National Railways system, the government of the day, through a responsible minister, pledged itself to the policy of readjusting the capitalization of the public owned railway.

In the special committee of the House of Commons which deals with accounts of the National Railways, this question was discussed, and Hon. Charles A. Dunning, minister of railways, stated unequivocally that he regarded the recapitalization of the system as being of "very great importance" and that the government desired at the earliest possible moment to do it.

Curiously enough, opposition to the recapitalization of the National Railways arose immediately from Conservative members of the committee, R. B. Hanson, Conservative member for York-Sunbury, who has taken a leading part in the work of the committee, at once asserted that the carrying out of such a policy would bring demands for reductions in rates. He thought this was a very strong argument against any action being taken.

Mr. Dunning and Sir Henry Thornton, however, held out for the recapitalization, pointing to the immaterial advantages which would follow and contended that only in this way could Parliament deal justly by the sole and conscientious officials who are endeavoring to make the system a complete success and who find that their best efforts avail nothing in overtaking the needs of a huge, unwieldy and unjustifiable capitalization.

Mr. Dunning introduced the subject and in the course of his remarks made it quite clear that the action probably would have been taken this session had it not been for the intervention of junior shareholders of the old Grand Trunk Railway, who are seeking the right to sue the government for compensation on account of their securities.

He failed to inform the committee as to whether or not the government would permit these shareholders to take action in the courts, but it is commonly believed that a flat will be issued and the case carried to the privy council.

INCREASE IN MANUFACTURING

PRODUCTS OF PRAIRIE PLANTS LAST YEAR MUCH GREATER

Winnipeg.—Manufactured products of the prairies during the past year exceeded the sum of \$327,000,000 in value, according to J. W. Ackland, retiring chairman of the prairie division of the Canadian Manufacturers' Association, at the annual meeting of the association.

Utilization of the mineral wealth of northern Manitoba and Saskatchewan, and exploitation of Alberta's oil resources promise tremendous increases in the industrial output in the three central provinces, he stated.

Starts Schedule May 19

Winnipeg, Man.—"The Confederation," Canadian National Railways crack passenger train operating from Toronto to Vancouver by way of Winnipeg, Regina, Saskatoon, and Edmonton, will go into service on May 19 from the east and on May 21 from the west. This train replaces the National which in the winter months runs between Toronto and Winnipeg.

RECEIVES FELLOWSHIP

Saskatoon, Sask.—Dr. William Allen, professor of agricultural economics at the University of Saskatchewan, has had a fellowship conferred on him which will meet the expenses of attending a conference of agricultural economists to be held during August in Devonshire, England.

Spain Guards Against Plague

Madrid.—A royal decree has been issued forbidding the importation of all classes of fresh fruits, plants and trees from Canada, the United States, Japan and New Zealand. The action was taken as a defence measure against insect plague.

CABLE IS RESTORED

Halifax, N.S.—The Halifax and Bermuda cable, which has been down for some time, has been restored, re-establishing direct communication between Canada and the British West Indies, via Bermuda.

W. N. U. 1783

WIN EMPIRE COMPETITION

King's Trophy In Empire Match Goes To South African Cadets

Ottawa, Ont.—Cadets from South Africa won the King's trophy in the rifle match in 1928, which was participated in by 23,000 boys from all parts of the Empire. Canadian cadets won this trophy in 1927, and finished second in 1928. The results have just been made public by the National Rifle Association.

Commenting on Canada's performance the National Rifle Association report says: "Not only does Canada possess many more brilliant individual shots than any other country but she has a limited number of units capable of achieving very special distinction. When mass efficiency becomes the principal object of the many and fewer low scores have to be included, her national team, the premier prize, the King's trophy will return to the Dominion."

While Canadian boys have lost the King's trophy they have had other remarkable successes in the competition. They won 82 silver medals which are awarded for scores of 99 and 100 points, and 162 bronze medals for scores of 97 and 98. The rest of the empire combined won a total of only 124 of these medals.

WILL PERFORM ELECTION DUTIES

KING GEORGE DESIRES TO CARRY OUT USUAL ROYAL FUNCTIONS

Bognor, Sussex, England.—The steady progress being made by the King is permitting the drafting of tentative plans for future functions, and there is every prospect that will be carried out. Transfer of the crown from Edward to Windsor Castle before Whitsunday, May 10, is contemplated in view of His Majesty's expressed desire to carry out the usual royal functions connected with a general election. The King will remain at Windsor Castle until the political situation permits him to go to Sandringham in Norfolk, where the east cast sea hawks have always agreed with His Majesty.

It is being suggested that a thanksgiving service for the King's recovery should be held in Westminster Abbey at the end of July, with similar services in other large cities.

CONVICT TRAIN TRAVELS WEST

SEVENTY PRISONERS ARE SENT TO STONY MOUNTAIN PENITENTIARY

Winnipeg.—The convict train, bearing 170 prisoners from Kingston, Ont., to western penitentiaries, reached here recently. Seventy prisoners were immediately transferred to Stony Mountain penitentiary, a few miles north of Winnipeg, while the remaining hundred continued the westward journey to Prince Albert penitentiary.

The convict train consisted of four steel coaches, the windows of which were heavily barred. Guards armed with rifles, were aboard the train, while during the stop here forty provincial policemen, also armed with carbines, stood guard.

The journey from the penitentiary at Kingston was uneventful, according to the prison guards.

LUCKY GOLD STRIKE

ONTARIO FARMER MAKES DISCOVERY WHILE DIGGING POST HOLES

Matheson, Ont.—W. R. Rhoades, Rye township farmer, has just finished digging a \$60,000 post hole.

As a pioneer on the edge of the northern clay belt, he decided to fence in more of his property. He used dynamite to dig his post holes. The first blast uncovered free gold.

Rhoades sold his find for \$60,000 cash and a large interest in the property.

LARGE LINERS PROJECTED

London, England.—The Cunard line is considering the construction of two new trans-Atlantic vessels which would be the largest in the world, it was stated on reliable authority. The liners would have a displacement of 75,000 tons, length of more than 1,000 feet and breadth of more than 105 feet. They would be equipped with 150,000 horsepower engines.

MESSAGE FOR AMERICAN PEOPLE

San Francisco, Calif.—Sir Rabindranath Tagore, Indian poet and philosopher, sailed aboard the liner "Taylo Maru" for India, via Hong Kong. His final words to the American public were the expression of a wish that his people "would rise above indignities and insults to impart some beauty to the utter ugliness of the industrialisation of the West."

AIRMEN KILLED AT TORONTO

Machine Went Out Of Control And Crashed Near Flying Field

Toronto.—Noel Marshal and William Mackenzie, residents of Toronto, were killed when their airplane went out of control and crashed near the Leaside flying field.

It was reported that Mackenzie who had but recently been granted a pilot's certificate, was in charge of the Gypsy Moth plane with Marshal, a qualified pilot, as a passenger.

The plane was said to have been but 150 feet from the ground when it went out of control and crashed with such force the engine buried itself.

CALENDAR EXPERT AT OTTAWA

M. B. COTSWORTH DISCUSSED MATTER WITH GOVERNMENT MEMBERS

Ottawa.—To aid in the suggested establishment of a national committee in Canada to consider proposed calendar reform and its effect on the Dominion, M. B. Cotsworth, of Rochester, N.Y., originator of the 13-month calendar idea, has paid a special visit to Ottawa. Mr. Cotsworth conferred with Dr. O. D. Skelton, under-secretary of state for external affairs, and H. H. Coats, Dominion statistician, respecting his proposition.

Princess Ingrid, only daughter of the Crown Prince Gustaf Adolf, of Sweden, whose engagement to the Crown Prince Frederick, of Denmark, has been reported from Stockholm.

Answers King's Message

A CHARMING PRINCESS

GERMANY WANTS AERIAL BOMBS ABOLISHED

BUT OBJECTIONS WERE RAISED BY SEVERAL COUNTRIES

Geneva.—The German proposal to abolish the use of aerial bombs in warfare was defeated before the League's preparatory commission on disarmament. Only five countries were in its favor—Greece, Sweden, Holland, China and Russia. Those against it, including Canada, the U.S. and Great Britain, registered their objections with a rider that a negative vote was not to be interpreted as in any way authorizing the use of aerial bombs against civil populations.

Count Von Bernstorff, of Germany, pointed out the toll that could be exacted by bombing planes over Paris, Berlin and London, and said that this method of warfare was horrible and cowardly, because the combatants were protected by defensive appliances.

F. Sokal, of Poland, said no one would deny the horror of such methods but the conference had not reached that point and under the Kellogg anti-war pact was not likely to reach it. When war had been outlawed, it was logical to begin codifying rules of war, he remarked.

M. Litvinoff, of the Soviet, here interpolated that Poland was among those who last year rejected the Russian proposals for complete abolition of armaments.

AGREES WITH GIBSON'S SPEECH

BRITISH GOVERNMENT SHARES WISHES OF U.S. ON DISARMAMENT

London, England.—Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the British government shares fully the hope and wishes of the United States government on disarmament as set forth in Ambassador Gibson's speech at Geneva.

"The government desired me to take this opportunity to express its warm appreciation of the cordial conciliatory spirit shown by the American delegates and give assurances on its behalf that in the same spirit and with the most earnest wish to reach a complete understanding it will," declared the American speaker.

Sir Austen made his statement in answer to a question by Commandant Joseph Kenworthy, Labor, whether Ambassador Gibson's speech had been called to his attention and what response his majesty's government proposed.

SUCCEEDS LORD REVELESTOKE

Paris.—Sir Charles Addis, director of the Bank of England, and noted English financial expert, has been appointed to succeed Lord Revelstoke as head of the British delegation to the conference on disarmament at Geneva.

The Associated Press correspondent has received the impression that France would place no obstacle in the way of such a preliminary understanding if it did not affect her position in relation to other continental powers. A high French authority voiced recently enthusiastic approval of the speech of Hugh S. Gibson recently, because it gave a magnificient impetus to reduction in armaments as a whole.

This personality explained that France desired to hasten general reduction in armaments and hoped that delegates would even be able to submit a draft treaty to the September assembly of the League of Nations, thus permitting an international conference by 1930. This would involve a second session of the preparatory disarmament commission during the present summer, until which time he thought the naval question had better be adjourned.

Washington.—Terminating the diplomatic correspondence on the "I'm Alone" sinking, Canada replied to the United States rejoinder to the protest against the sinking by coast guards' gun fire on the high seas, of the Canadian schooner suspected of conspiracy against American liquor smugglers.

GIBSON'S PROPOSALS

Geneva.—It was understood here that Ambassador Hugh S. Gibson, American spokesman at the preparatory disarmament conference, would prepare a memorandum outlining United States disarmament proposals and hand this later to delegations of the great powers.

BRITISH ELECTION IN MAY

London, England.—Premier Baldwin announced in the House of Commons recently the prorogation and dissolution of parliament for May 10, nominations for seats in the House on May 20, and polling on May 30.

MORE NORSEmen FOR THE WEST

This photograph was taken at Winnipeg after the arrival of the first immigrant special train this season, over the Canadian National Railways, March 20. There were 205 broad-shouldered Scandinavians in a total of 369 arrivals, which included 22 British settlers. Two trains, which followed the first special a day later, brought the total of new-comers up to nearly one thousand. At least half were Scandinavians. All the immigrants have been placed by the Canadian National Railways' Colonization Department.

H.B. STRAITS ARE OPEN FOR FOUR MONTHS OF YEAR

Ottawa.—Hudson Strait will be safe for navigation for at least four months in the year. The report of the Hudson Strait expedition for 1927-28 tabled in the House of Commons gives the probable period as from the middle of July to the middle of November.

In his report N. B. McLean, officer in charge, says in part:

"Taking July 19 as the opening date for the strait, and November 6 when ice was first reported at Nottingham in 1927, as the closing date, we get a season of 120 days or practically four months, during which commercial vessels could have navigated with safety and without assistance of ice breakers."

A further indefinite period would be added, he continues, with the use of ice breakers.

Some doubt is expressed in the report that two years' observations are sufficient on which to base any accurate statement on the length of the navigation season.

The extreme of temperature are given as 18 degrees Fahrenheit below zero at Nottingham in January, and 50 degrees above zero in July at Walkham Bay.

Fog was noted on 39 days and on 14 of these it was dense. Many icebergs were seen. They drifted down through Davis Strait, were carried west along the north shore by the current and eventually met the easterly current of the south shore which took them into the Atlantic.

Three direction finding stations in addition to those at Cape Hope, Advance, and Nottingham Island, are recommended, and two ice-breakers, one based at Fort Churchill and the other at a suitable harbor in the strait.

"The knowledge that an ice breaker is available if necessary," the report states, "gives confidence to masters, owners and shipping interests generally."

Other recommendations deal with charting the strait and providing a fuel base.

OBSERVE ANZAC DAY

AUSTRALIA COMMEMORATES LANDINGS OF TROOPS AT GALLIPOLI

Sydney, N.S.W.—Anzac Day, set aside to mark the famous landing of the Australians and New Zealand troops at Gallipoli with the aid of strong naval forces on April 25, 1915, was fittingly commemorated in Australia and New Zealand. The outstanding New South Wales feature was the march of 20,000 ex-service men at Sydney.

At Canberra, the Federal capital, an impressive memorial service was attended by Premier Stanley Bruce and his cabinet, while Lord Stonehaven, Governor-General of Australia, unveiled the commemoration stone of Australia's war memorial which will cost \$1,250,000.

TYPHOID FEVER AT THE PAS

SERIOUS EPIDEMIC BELIEVED TO BE CAUSED BY WATER

The Pas, Man.—Active measures to stamp out the outbreak of typhoid fever, which already has taken a toll of three lives, and stricken more than a score of persons in the little northern railway town at Mile 327, on the Hudson Bay Railway, are under way. Four doctors now are in the town; all residents have been inoculated, and the water supply has been chlorinated. Impure water is believed to have caused the epidemic.

Twelve of the stricken residents of the town have been conveyed to a hospital in The Pas, while eight others are confined to the little hospital at Mile 327.

ORGANIZE WHEAT POOL

Lincoln, Neb.—Wheat-raisers of Nebraska and Wyoming to the number of 200 have effected organization of a wheat pool, giving it the name of the Middle West Market Association non-stock co-operative. The pool was said to represent 13,000 grain raisers in the two states and was declared to be the largest in the middle west.

AIR SURVEY COMPLETED

The Pas, Man.—Arriving here, Captain Charles Sutton, pilot, and party have just completed an 8,000-mile aerial voyage which took them into the northern wilds, far beyond Fort Churchill. Motion pictures of the northern scenes and of the inhabitants, the Eskimos, were taken. This was the main objective of the journey.

Get behind the Wheel and Get the Facts

Measure, behind the wheel of the 1929 McLaughlin-Buick, its matchless performance of its great five-cylinder engine, the riding comfort of its resilient springs (actuated to cushion the load, and not to take driving strain) and its Loveloy Hydraulic Shock Absorbers, the luxury of its deep, soft cushions, full width seats, and the superb appointments of its Masterpiece Bodies by Fisher.

Drive the car. Make your own exacting tests — traffic over the hills, and on the straight-away — and learn the revolutionary performance which makes McLaughlin-Buick the two-to-one favourite among all cars at or above its price!

NOTES AND COMMENTS

The Rotary Clubs of District No. 4, comprising clubs from Fort William to Banff, and from the International boundary north, recently held their annual district meeting in Edmonton. Rotary includes in its membership one of each classification of business in the city or town where a club is established, and it is the rule to select the most useful man and the one who is willing to give some time to community service. It does not select dross or those who want to ride on the band-wagon without doing their share of work in community up-building.

A noticeable feature of the convention was the prominence given to the Boys Work programme of Rotary. Every member of Rotary is a busy man, yet as a class they recognize the importance and necessity of boys work. It is worthy of comment that in any centre where Rotary is established, either city or small town, it has had a beneficial effect in the life and business ethics of the community, and its extension to forty countries demonstrates that it makes no distinction of either race, creed or class. It demands that a man be a useful member of society and particularly to the community in which he lives and carries on business.

Efforts have been made to organize a club for the Pass towns, and there is splendid scope for a club of its nature in these four towns of Coleman, Hillcrest, Blairmore and Bellevue.

"Flies or Babies—Which?"—This interesting title to a brief but very telling little pamphlet issued by the Metropolitan Life Insurance Co., gives a very real meaning to the "Clean Up" week which is being urged on all communities at this season.

Filth and garbage of all kinds accumulate during the winter months. With the coming of the warm days the house fly appears. It is born in filth, lives in filth and when not busy on butter, milk, preserves or the baby's bottles, is feeding in filth.

It is estimated that the flies are responsible for more deaths than any single known disease. Babies are its particular prey since the infantile diseases are carried largely by the pest. Get rid of it by cleaning up all filth and garbage. Make a habit of burning all refuse. Give it no chance to breed. Screen doors and windows at the first hint of warm weather. Two flies at the beginning of the season will be responsible if allowed to live, for millions of other flies, they breed so rapidly. So clean up, burn up and screen doors and windows. Is it to be flies or babies? The choice is yours.

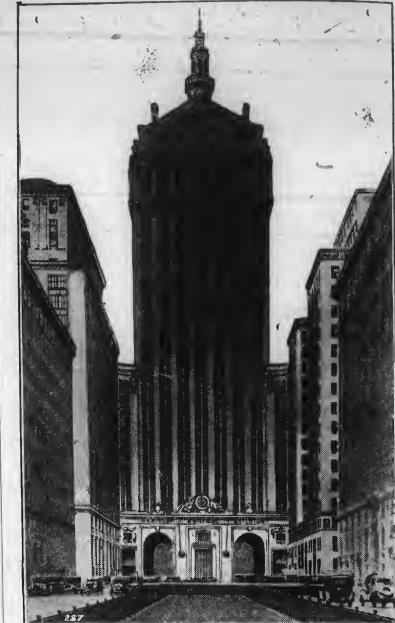

For literature on the summer care of babies send to the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alberta.

Youth must be served, and 'twas ever thus! Nowadays the children think their parents old-fashioned and behind the times if they do not own a car, a radio, phonograph and generally speaking, "step out". But the average man's ability to increase his earning power to pay for these seeming luxuries has not kept pace with the present-day trend. The younger generation may learn how to purchase all these things and yet pay the grocer, the butcher and every other person who supplies them with goods, but many of the older people who have tried find that they do not get the peace of mind which means happiness while they are figuring how their future income is to be made to spread out sufficiently to meet the various monthly instalments. The old maxim was "save before you spend." Instalment purchasing says spend before you earn, with the result that much of the happiness which people believe they are to obtain by this plan, which appears glittering in perspective, proves to be a source of worry and struggle, with a tendency to make them think that the tradesmen can wait a little while longer while something with a mortgage or a lien on it is paid for.

To eliminate competition in Germany, General Motors Corporation has purchased the largest automobile manufacturing plant in that country. The Kaiser tried to rule the world. General Motors is trying the same plan in the auto industry, but by a less belligerent method. The Kaiser's weapons were blood and iron; General Motors are American dollars.

It is time that a general agitation was made throughout Canada to bar some of the pernicious American literature that comes into Canada. It is alright to be on a friendly relation basis with one's neighbors, but when those same neighbors tell you frankly that they are going to protect their own industries, regardless of the effect it has on Canada, then it is nothing short of weakness to turn the other cheek. Mutually satisfactory relations can only be maintained by reciprocity, and it applies to nations right down

to business men and individuals in small towns, such as Coleman. Canada, as a self-governing Dominion of the British Empire, does not have to accept any treatment the United States hands out in the matter of tariff against Canadian goods. There are other avenues of trade to be developed on a profitable basis.

The Gateway of C. P. R. Connections to New York

At the heart of New York, at 42nd Street is the New York Central Station where Canadian Pacific trains from Montreal and Toronto arrive and depart. The above is a photo of the New York Central building which is a part of the station building and is one of the outstanding buildings in the city of New York. Standing almost forty stories high at the head of Park Avenue it rises above the high buildings surrounding. It is of gold relieved by brilliant reds and greens and when lit by a battery of flood-lights at night it is one of the beauties of New York and can be seen for many miles around.

Here and There

234. The contract for a new fast steamer to ply between Saint John and Dieppe, New Brunswick, shortly be awarded by the Canadian Pacific Railway. It has been announced by E. W. Beatty chairman of the board of the company. The ship will be the biggest, length, 245 feet in length, capable of carrying 500 passengers, and having 44 state rooms for night service. The ship will also accommodate for 50 motor cars. The speed of the vessel will be 23 knots, an unusually high speed for a short trip.

The ship can freely this spring, but will be unable to run to surpass the record of last year when there was an increase of four million pounds of maple sugar registered government.

The output was valued at over two million dollars, and Quebec headed the list of provinces as producer, followed by Ontario.

The daily mail of the Canadian Pacific is \$287,000; the daily outlay for material and supplies is \$10,000, and the daily bill over \$20,000.

Prince George, Duke of Gloucester, third son of His Majesty, will early in June officially open the great Royal York Hotel of the Canadian Pacific Railway in Toronto. The hotel will be headed by E. W. Beatty, K.C., chairman and president of the company. The building is the tallest in the British Empire, towering 23 stories above the elevations of the "Queen City."

In a recent Calgary high-school examination, English candidates in the finale were born respectively Canada, England, Lithuania, Roumania, and Russia. Of three contestants, one was born in France, one of German, and one of Scotch extraction.

Four seagull-hunting travellers have bagged as fine a prize as Viscount Wellington, Governor General of Canada, who was presented with one of the biggest Tarts ever seen in the Pacific during his recent cruise in the Princess Norah, latest addition to the fleet of the British Columbia Coal and Lumber Company of the Canadian Pacific Railway. His Excellency was given an insight into the activities and possibilities of Vancouver Island and was much impressed by the beauty of the coastal region and at leisure offered them by admiring expression.

A party of immigrants who within a short time are expected to multiply in large numbers and become thoroughly Canadianized, arrived yesterday from recently via Canadian Pacific Express. They were rabbits—brown rabbits—sent from Germany to points in Ontario for breeding purposes. They appeared to be in excellent condition, their long journey and constantly nibbled at lettuce offered them by admiring expression.

Every year the Canadian Pacific spends about \$2,000,000 in advertising its services and Canada's industrial and tourist attractions throughout the world.

In view of the present prosperity of Canada and of the Canadian Pacific, it is amusing to recall the items published in the Journal over five years ago. "The Canadian Pacific Railway," it runs, "has begun to launch its bonds. This railway, if it be not finished, will be the third connecting bridge for seven or eight months of the year, and will connect with the eastern part of the Dominion, a province which embraces about as foreign a population as the face of the earth. British Columbia is a barren, cold mountain country that is not worth exploring. It would not have been induced at all unless by tempests of the Hudson Bay Company had 'gold fever' not taken a party of adventurers there. Fifty miles of the coast not galvanized it into prosperity. The half-dozen Manitoba settlements will not bold out many years. The people who have gone there cannot stand the cold climate, the winter. Most of them are frozen to death in numbers that would astonish the intending settler, if he knew, and those who are not killed outright are often maimed for life by frostbites."

For First-Class Work and Quick Delivery, send your HEMSTITCHING to Barton's Music & Sewing Machine Store, Fernie, B.C.

Here and There

(232) A fine steel piano wire runs now 1284 miles from Newfoundland to the Azores. This is not to provide the cables with a means for carrying messages, but to measure exactly the distance between the two points. The cable was laid recently and it was impossible to measure the distance by the cable-laying ship.

Travellers aboard the Canadian Pacific Railway's crack liner, the Trans-Canada Limited, will be surprised this year to find a choice of upholstery, green and blue, bathrooms, sofas, settees, glassed-in conservatory and other unusual features. Special sleeping, dining, and lounge saloons can have seats, desks, and built-in cupboards. The company's Montreal Angus shops for this de luxe transcontinental train, which will be one of the fastest and finest long distance trains in the world.

Construction of the 18-story building rising on the corner of Burrard and Hastings Streets, in Vancouver, has begun. When completed this will be the tallest building west of Toronto, where the building is to be the new Royal York Hotel of the C. P. R. is 23 stories in height.

A monument to one of the builders of Canada is planned for Vancouver. Sir William Van Horne, first general manager and second president of the Canadian Pacific Railway, will be the selection of Vancouver as the western terminus for the transcontinental line, a decision that resulted in the great and prosperous Canada's second greatest seaport; and the citizens of the city propose to commemorate his foresight.

Between four and five thousand bags of Garnet wheat are being shipped from Fort William to be tested by experts in Great Britain. Reports of the reception given these samples will be available before this year's crop is ripe, government officials expect. If these prove favourable the future of this early ripening variety should be assured.

BEAUTIFY CANADA

Clean Up, Paint Up, Keep It Up -- Increases the Value of Your Property

THE SECRET OF Skin and Hair Loveliness

IN THE regular daily use of Cutieusa Soap and the occasional use of Cutieusa Ointment, women everywhere have discovered the secret of natural beauty. The Soap, fragrant and pure to cleanse; the Ointment, antiseptic and healing, to remove pimples and irritations.

Send for free booklet "How to Use Cutieusa". Sample each free. Address Canadian Dept. J. T. Wain, Ltd., Montreal.

WORLD HAPPENINGS BRIEFLY TOLD

Prince Henry of Prussia, brother of the former Kaiser, died recently of pneumonia.

Geza Ledowsky, a Viennese pianist, claimed a world record for continuous piano playing when he stopped seventy-five hours and fifty-five minutes after he began.

The German stand on reparations tends toward a new war, George Clemenceau, war time premier of France, said in an interview published in the *Echo de Paris*.

Financial conditions in the British West Indies are not very good at the present time, owing to the low price for sugar, according to Right Hon. F. A. Anglin, P.C., chief justice of Canada.

A special train recently carried 170 prisoners from Portsmouth's penitentiary, Kingston, to penitentiaries of Western Canada. Seventy prisoners were consigned to the provincial penitentiary of Manitoba and the remainder went to Saskatchewan.

Ching Ming King, Chinese, convicted on a charge of unlawfully importing opium into Canada, was sentenced to six years in the penitentiary by Mr. Justice D. A. McDonald, presiding at the spring session of the Nanaimo assizes.

An application by the Canadian attorney-general's representative to the privy council to fix June 17 as the date for hearing of an appeal concerning the validity of the Canadian fisheries act was opposed on behalf of the provinces of British Columbia and Quebec.

Peved because of asserted rudeness by American immigration officials at Vancouver, B.C., Sir Rabindranath Tagore, noted Hindu poet and philosopher, declined to leave his ship, the liner *Tahoe Maru* when she docked at San Francisco en route to Japan.

Increase In Gold Supply

Was Greater By Sixty-One Million Than Amount Minted In 1928

Gold holdings in the United States at the end of 1928 were reported by the federal reserve board in the April issue of its bulletin to have been 37.6 per cent of the world's total, which amounted to \$9,881,000.

The total gold supply was compiled from reports transmitted to the board from 40 countries and shows that the increase in gold of \$466,000 in a year was greater than the amount of gold mined during the year by about \$51,000,000. The increase was made, the report said, even though about \$50,000,000 was absorbed by Great Britain and an unknown amount taken away for industrial consumption.

The bones of an average man weigh twenty-five pounds.

Airplane On Submarine

Big Innovation Has Been Added To Italy's Newest Craft

Italy's largest and best equipped submarine, the *Franco Tosi*, has been launched at the dockyards at Taranto, Italy. The submarine has 3,000 horsepower. Diesel engines of special designs which can be used separately or together, which give a surface speed of 19 miles an hour. Two electric motors of 1,000 horsepower each propel the submarine at a speed of ten miles an hour under water.

The submarine's artillery is one anti-aircraft gun and several machine guns. The submarine is to carry a seaplane in a large tube adjoining the turret, a big innovation in submarine technique. The tube is able to resist over 300-foot depth water pressure.

THESE SIMPLE RULES MAKE TEETHING EASY

Be careful of Baby's diet during teething. Do not overfeed him. Watch his stomach and bowels and at the first sign of indigestion, give him a few drops of harmless, pleasant-tasting Fletcher's Castoria. These simple rules are making teething easy for millions of babies--and mothers, too. For on this third year of life, the child is the trusted standby of every mother. It sooths wakeful, cross babies to sleep quickly and easily--and it's pretty remarkable to see how quickly the effects are seen. You can do the work of castor oil better and more gently. For your protection, the bottle of genuine Castoria always bears the Fletcher signature.

Draws Attention To
Peace River District

Has Room For 2,000,000 People Says
Major-General McRae

Major-General Sir D. McRae will draw the attention of parliament to the colonizing possibilities of the Peace River country. He will

say it to that area last year had more than confirmed his previously expressed opinion that 2,000,000 people can find homes for 400,000 farms of 240 acres each. General McRae will urge greater railway facilities, modern methods of preparation of scrub land, and a national colonization and settlement policy extending over ten years.

Minerals In Alberta

Alberta is famous for its vast resources of coal, for the rapid development of its oil and gas resources, and for the extent of its unique deposits of bituminous sands.

The oldest steamship in the world is said to be the barque "Constance," built in 1723, and now in use as a training ship at Copenhagen.

Canada's Forest Products

One freight car in every six in Canada is loaded with forest products.

WELCOME TO CANADA

These are youthful British settlers coming under the auspices of the British Immigration and Colonization Association. They are seen listening to a few words of welcome before they landed in Canada this spring from the *Anchor-Donaldson Liner* "Athenia."

Soldiers' Settlement

31,360 Veterans Have Been Settled
On Farm Lands

Veterans to the number of 31,360 have been settled on farm lands, with and without loans, under the Soldiers' Settlement Act, according to a report issued in the House of Commons. No fewer than 6,650 of these men, established themselves without financial assistance from the Government. More than 6,000 acres in all, at an average price of \$10 per acre, have been bought or homesteaded by the Vets.

SUNDAY SCHOOL LESSON

WHAT HILKIAH FOUND IN THE
TEMPLE

Golden Text: "Thy word is a lamp unto my feet, and a light unto my path." Psalm 119:105.

Lesson: 2 Chronicles 34:1-33.

Devotional Reading: Psalm 19:7-14.

Explanations and Comments

The Temple Repairs Which Led To The Finding Of The Book Of The Law, Verses 8-13. When twenty-six years of age, Josiah turned his attention to the temple, which had been neglected. He placed in charge of the work the governor of Jerusalem, the official secretary and the official historian. He added to Hilkiah the high priest, the man who brought the people to the temple and gave to the Levites who were appointed to receive it. The overseers were Levites. This is believed to be the earliest record of the Levites who were scribes and officers and porters. The work was done faithfully and progressed rapidly.

The Finding Of The Book Of The Law, Verses 14-16. --During the work upon the temple, Hilkiah, the priest, found the book of the law of Moses given by Moses. This is believed to have been the legal portions (chapters twelve to twenty-six, and chapter twenty-eight) of our Book of Deuteronomy, which calls itself "The Book of the Law of Moses, the Book of the Covenant." Some scholars believe that this had been long known, but had been forgotten due to the idiosyncrasies of Manasseh and Amon, and Hilkiah found the copy in the temple and read it to Josiah for the first time. Consequently, it was a new and enlarged edition of the book of the Covenant prepared for the needs of the times, and brought forth because Jehovah was a righteous king and would enforce his law.

George Adam Smith points out that it is precisely from this time onward that the style and phrasology which are characteristic of Deuteronomy begin to affect the literature of Israel.

The Effect Upon Josiah Of The Reading Of The Book Of The Law, Verses 17-21. --After telling the king that the law of the land was progressing well, the monarch was given to the overseers and the workers put at work. Shaphan spoke along the newly discovered book and showed it to the king, according to 2 Kings 22:10. On hearing the words the king rent his robes in tokens of his troubled mind, "For," he said, "great is God's wrath against us, because our hands have not done this book commands." If we would see the effect the book must

have had upon the susceptible soul of Josiah, we are advised to read chapters 22-26 of Deuteronomy ourselves with Josiah and his times in mind. The book contains explicit directions to the people to repent and the penalty of national disbanding decreed was the loss of home and country. "For many generations past people have been wicked and have been neglected, and when the day of doom should come, the sins of the fathers also would be visited upon the children. Could the doom be visited by the fathers and complete obedience and penitence?"

"It is not enough to read our Bible. Its messages must be heeded. Learn and observe these words found in an old tablet:

When thou readest what here is written, let thy best practice second it; So twice each precept read shall be --

First in your book and next in thee,

The Care Of Books

Many women who take beautiful care of their clothing and their kitchen utensils, their linen closets and their refrigerators, are careless about those choicest treasures of the home--the books. We are all apt to stick books away in bookshelves and forget all about them except to whisk an occasional duster along the fronts of the shelves.

Books need just as much care as rugs, household linens and fine leather shoes, if they are to enjoy long life and keep their shape and freshness. Dust accumulates on book shelves almost more quickly than anywhere else in the house, or at least it seems to, perhaps because there are so many edges exposed to the sweeping dust particles.

The light wool or feather duster should be used daily, and, at least once a month, every book in the house should have individual care. Turn it down and wipe off the cover and the tops and sides of the pages. Many little-used books have a yellowed edge of dust along each page, which could be avoided if they were wiped off frequently. If you have choice leather-bound books in your collection, whether sheepskin, calf, or morocco, give them a light coating of pure neatso oil once a year, to renew the leather.

Keep all books out of the direct rays of the sun. This dries out the glue and tends to weaken the binding and will ultimately fade all of the colored cloth covers. Another way to keep books in good condition is to see that they stand upright at all times, whether between the book ends or on the shelves. A book tipped sideways gets its covers pushed out of shape and tends to come apart. If books do not support each other by standing close together, a small japanned book end may be inserted here and there on the shelves.

The way a new book is opened has much to do with its future health. By opening a few pages at a time and gently pressing them back, the backs will not be broken nor will the glue and the stitching be strained. A

book that is grabbed and cracked open violently may be permanently injured.

Make Your Priming Coat

By a primary coat is meant the first, or primary, coat of paint or varnish on any surface of wood, metal or plaster. The first object of the priming coat is to stop most of the suction, present to a great extent in wood and plaster, so that the finishing coats will stand out with a uniform degree of gloss, or, in the case of metal, stand out with a uniform degree of flatness.

In this connection, please note that no such uniformity can be obtained until the porous nature of the surface, or suction, has been satisfied. In the case of metal surfaces the degree of suction, or porosity, is far less noticeable; therefore, such surfaces will naturally call for a different priming treatment.

The second object to be aimed at in the first class priming coat is a proper degree of penetration of the fact, so that the paint will to the greatest possible extent become a part of the surface—not merely so much pigment and oil spread out on top of, and insecurely bound to, the surface.

Bearing these objects in mind, the saleman will readily understand that a thick priming coat cannot possibly be a good priming coat. Why? Take the first object outlined above. If a thick priming coat is applied on wood or plaster the porous nature of the surface will suck away most of the oil from the paint, which, mind you, needs just this quota of oil to bind it and form a good film. The result is, that instead of having stopped the suction, you have merely superimposed another surface, porous in nature because it has been deprived of its much oil and insecurely bound to the surface for the same reason, and that also kicks the paint from under our second support—the second object.

So we arrive at the natural and logical conclusion that priming coats on wood and plaster must be thin. Coats—it is almost impossible to get them too thin. If a priming coat can be said to be too thin, such a claim

can only be advanced from the covering or hiding viewpoint—a defect which can be easily remedied by an additional coat. But if too thick a priming coat is applied, a dozen coats will not cover up the blunders, because it will be exposed by the almost inevitable result—peeling of the paint from the surface.

When in doubt—thin priming coats.

Literature On Farming

Some Must Turn Deaf Ear To Educational Matter Supplied

When one reads of the poor methods that are used in farming by a number of men who are engaged in that profession, one is tempted to wonder whether the enormous mass of educational matter that is being run from presses and the manuscripts by the department of agriculture is reaching the proper quarters, or whether the farmer turns a deaf ear to the good advice and goes on with his dirty seed, his scrub herd, his runty sheep and his unprofitable poultry run, out of sheer cussedness.

Tallest Building

Construction has begun on the Marine Building in Vancouver, which, when completed, will be the tallest building in Canada's west of Toronto, towering 18 stories above the northwest corner of Burrard and Hastings Streets.

Dean (to Frosh): "Do you know who I am?"

Frosh: "No. I don't, but if you can remember your address, I'll take you home."

"Have faith in your fellow man," says a paragraphist. But be sure you get his signature on the dotted line.

What many people call indigestion is often really a condition of the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

alkali in water will neutralize the acids as much as a glass of milk. You will never use much medicine when once you learn the efficiency of this. Go get a small bottle to try. You can get it generally in Phillips' Milk of Magnesia prepared by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

CHAPTER XVIII—Continued

Donald's heart ached for this man, whose great love for his wife was as passionate at this moment as when she was living. "How he loved her," he thought.

When Wainwright spoke again his voice was spiritless. "You are the first person to whom—have spoken of my past; even Constance does not know." As he turned to leave Donald gripped his hand in silence, but with a pressure eloquent of heart-sympathy.

Andy had noticed Donald's increasing interest in Constance and had wisely refrained from accompanying him on his nightly visits. On this particular night Donald came into the kitchen whistling a lively air, his face wreathed in smiles. He slipped Andy heartily on the back as he asked him for a lunch. His gaiety was so pronounced that Andy studied him closely.

"You look 'appy, Donnie," he remarked.

"I am, Andy; I'm the happiest man in the world."

He finished eating, then sat staring dreamily at the smoke of his cigarette as it circled about his head. Andy discoursed lightly on various subjects, but Donald did not seem to hear him. After he left Andy heard him singing merrily in his cabin.

"Strike me pink, but I do 'ope Donnie has waked up! What a pair, what a pair!" he said to himself.

In the morning Donald rode north on the gas-car to the scene of logging operations near the upper lake. He left orders with the men to bring Wainwright's baggage to the station. What Constance's absence would mean was brought forcibly to him as he met the trapper leading Pegusus and her pet deer down the trail to his cabin.

Two hours later Constance and her father stood on the station platform.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dread "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nervilene. Half a teaspoonful of Nervilene in water makes a most efficient gargle. The germ-killing properties of Nervilene quickly destroy any bacteria in the mouth or throat. If the throat is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nervilene. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nervilene and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Andy stood with arms folded. "Gone?" he yelled, "of course it's gone. Why in 'ell won't you 'ere?"

"I had to go up the line to look over some logs, and the car broke down," replied Donald bitterly.

"Of course," Andy withering sarcasm, "the timber couldn't 'ave waited another day."

"Andy," asked Donald excitedly, ignoring the remark, "did Connie leave you her address?"

"Wouldn't she should give me 'er address? 'Aren't you 'er address?' was Andy's unaccommodating reply.

"No, I haven't. I know that they are going to England, and that is all."

Donald sat down dejectedly.

Andy's face softened. "Do you like Connie?" he queried.

"Like her? I love her!"

"That can I don't see 'ow she didn't let you know where to find 'er," puzzled Andy.

"She doesn't know that I care for her," said Donald gloomily.

Andy's mouth opened. He seized Donald by the shoulder. "Do you mean to tell me that you let that girl go away from you without letting 'em know that you wanted 'er?" he demanded incredulously.

"Strike me 'andsome," blazed Andy, "of all the blinkin' mutts in this 'ere world—*you*—" Speech failed him for a moment. "You let that dear little girl go away broken-hearted."

"Andy," interrupted Donald eagerly, "do you think Connie cares for me?"

For a moment, as he looked into his friend's face, Andy was tempted to tell him of the scene after his fight with Hester. But the promise to Connie sealed his lips.

"Oh 'ell should I know?" he mumbled. "But," he added with fine sarcasm, "if bone was ten cents a cubic foot you'd be a multi-millionaire, you blinkin' pie-eyed nincompoop—you—you—" He clapped a tragic hand to his brow. "You give me a 'eadache" and muttering to himself, he nudged up the 'ill.

The next day Donald went to Vancouver. He scanned the registers in hotels, inquired at docks and depots, but no traces of the Wainwrights could he find. He walked the streets with a forlorn hope that he might meet them. The hearts of many slender golden-haired girls were set fluttering that day as a tall, handsome young man subjected them to a close scrutiny.

Two days later he returned to the lake. That night he switched off the light and sat by the open window looking out on a night of stars, with a new moon making a ghostly light on the lake. An owl's mournful hoot was answered by the uncanny cry of a heron. The faint sighing sound of streams in distant gorges became a haunting chorus to this duet. He thought of Constance, up the mountain, now cold and dark. How he wished she were here! What an idiot he had been not to have known long ago that he loved her. He knew now that he had loved her from the first. Dear little Constance!

Donald walked the floor until midnight. Once in bed, he tossed restlessly until the early morning, then fell into fitful sleep in which he dreamed of a small, winsome face and blue eyes surrounded by a wealth of golden hair.

September with its days of mellow sunshine passed. October brought heavy hoar frosts that covered the earth with a robe of diamonds, and formed ice in the small pools and marshes. Winter comes early in the mountains. In mid-winter the valleys between the peaks of the Coast Range will have five feet of snow when a few hundred feet below, where the warm waters of the Pacific lap the gentle slopes, the grass is green and there is none of the chilly whiteness that mantles the towering hills above.

There came a day in November when the air held a somber stillness. The fir and pines pointed straight to the sky without a quiver in their branches. The brown earth seemed to say, "I am ready." The cry of the loon in it had a dreary sound, a note which seemed to say that winter was coming. Squirrels working in the tops of big pines increased their efforts. The cones, nipped off by their sharp teeth, fell patterning to the ground, to be gathered by these busy little workers and secreted in their nests in hollow trees. The bear of the hills ate the frozen berry or the pulp of rotten log to cleanse its stomach before starting its long winter sleep in windfall or cave. Thus does Nature give to the wild things of the forest the instinct unknown to man.

(To Be Continued.)

The longest railroad run is from Riga to Vladivostock, 6,800 miles.

Minard's Liniment relieves pain.

W. N. U. 1788

Little Helps For This Week

"I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, to give you an expected end."—Jeremiah xxix. 11.

His perfect plan I may not grasp; Yet I can trust Love Infinite, And with my feeble fingers clasp The Hand which leads me to the light.

My journey on His strand goes;

The end I know not, but God knows,

Every human soul has a complete and perfect plan cherished for it in the heart of God—a divine biography marked out which it enters into life to live. This life, rightly unfolded, will be a complete and beautiful whole, an experience led on by God and unfolded by His secret nurture, as the trees and the flowers by the secret nurture of the world. We live in the divine thought. We'll all in the great, everlasting plan of God's intelligence. We never sink below His care, never drop out of His counsel.—Horace Bushnell.

Weather Heads the List

Stratford Editor Finds It Most Widely Read Article

What is the most read section of a newspaper? Sports writers will say their page is; editorial men will press the claims of the editorial page; reporters will be certain to assert that they have first place with local stories, while we have no doubt that the lady editors will be quick to claim precedence for the women's page.

All wrong. One day last week the weather, through an error, was left out of the paper, and we had more calls over the omission of that little item than anything else that has ever happened.

An Oil That Is Praised Everywhere.

—Dr. Thomas' Electric Oil was left upon the market without any flourishes over fifty years ago. It was put up to meet the wants of a single oil which was then scarce. Its merits became known it had a whole contingent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Preservation of Eskimo

Tribute was paid to the Dominion Government, the Royal Canadian Mounted Police and the Hudson's Bay Company, for the splendid work being done for the preservation and the well-being of the Eskimo, by Ven. Archdeacon A. L. Fleming, appointed recently to take charge of Anglican mission work in the Arctic.

Minard's Liniment—goes for tired feet.

Many railways in Germany are being electrified.

IT'S folly to suffer long from neuralgia, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for sore throat, throat inflammation. Proven directions for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

Aspirin is a Trademark Registered in Canada

Capital Invested In Irrigation

Construction costs of ten major irrigation projects, now operating in southern Alberta amount to about \$21,800,000, or an average cost of approximately \$31 per acre for the area of slightly more than one million acres.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

Floorwalker Greasing assistant for contradicting a customer: Miss Jones, remember, in this establishment the customer is always right."

Miss Jones: "Well, sir, she said you were an old shark."

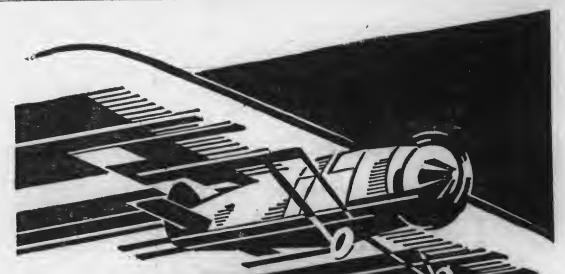

COMPLEXION IMPROVED

of spending many dollars on fancy creams and skin lotions, buy a 25c pck. of Carter's Little Liver Pills and remove the constipation pains. Your complexion will quickly cleared, and your health improved. All Druggists 25c and 5c red pck. CARTER'S LIVER PILLS

FASTER-FASTER-FASTER

In the sky and on the highways modern motors, developing greater power and operating at higher speeds, demand better lubricants. Marvelube was developed to meet this demand. It is a better crude petroleum.

Produced by the Special Marvelube distillation process, it is free from injurious sulphur and costly carbon. It has a remarkable body, and because it is manufactured under the constant supervision of Canada's most expert refining technicians you are sure

of unrivaled quality and enduring satisfaction.

Marvelube because it has been proved in actual service that it affords longer intervals between engine overhauls.

Marvelube insures smoother performance, longer engine life and lower operating costs for any car, old or new. There is a grade of Marvelube refined to meet the exact requirements of your car.

Consult the Marvelube recommendation chart at good dealers!

Local News

Hubert Clark has been transferred from the Bank of Commerce branch at Gleichen to Taber, Alta.

The Junior W.A. of St. Albans' church will hold a pantry sale on Sat. May 11 in the parish hall.

Margaret Halliwell returned to Medicine Hat general hospital on Tuesday after spending three weeks vacation at her home here.

Mrs. Martin, president of the Rebekah Assembly of Alberta, made her official visit to the lodge on Tuesday, and while here was the guest of Mrs. Robert Evans.

Mrs. J. L. Lonsbury was admitted to hospital last week and operated on last Friday. Latest reports state that she is making progress.

The dance held by the Oddfellows and Rebekah lodges last Friday evening in honor of the 110th anniversary of the founding of the Oddfellows, was attended by many from town and nearby lodges, and Mr. Parker, field secretary, was present and gave a short address.

The Knights of Pythias will hold a whist drive on May 23, followed by a dance.

Willard Dutil of the Coleman Hardware Co. went to Calgary on Tuesday evening to consult a specialist, as he has not been feeling up to the mark for some time.

The funeral of Wilma Goulding, infant daughter of John and Alma Goulding, took place on Friday, April 26, the Rev. A. D. Currie of St. Albin's church officiating. The pall-bearers were four little girls, Peggy Gillespie, Anna Booth, Lily Spillers and Marguerite Salvador.

Dr. Borden suffered slight injuries on Tuesday evening when his car overturned by slipping off the grade when he was making a turn on the Blairmore road. The windows on one side of the car were badly shattered.

The town band enlivened the atmosphere yesterday afternoon by marching around the residential section and finishing up with a short program at the post-office. The boys march well and played some snappy march tunes which were highly appreciated.

QUALITY - SERVICE - LOW PRICES

Safe and Comfortable

THE Ford car rolls down country roads as smoothly and comfortably as over transcontinental highways. Roomy front and rear compartments—lots of leg room, head room, body room—make it the ideal family car.

The safety features of the Ford car give driver and passengers a sense of security and well-being. They enable one to avoid dangers in traffic and the inbuilt strength of the car resists damage from the careless driving of "the other fellow."

DURABILITY—The durability of the Ford car has never been fully measured because one year of consistent driving leaves it like new. But it is possible to estimate by the materials that go into it, the fine alloy metals, high grade equipment and better basic quality in every part; that after thousands of miles of service are built into its chassis.

SAFETY—The fully enclosed air brake system, the flying wheels with silent power, the windshield is of shatterproof glass. An all-steel body gives maximum protection. At high speeds the unique and effective Ford spring and shock absorber system provides perfect balance.

COMFORT—Deeply upholstered seat cushions, set at a restful angle, match in comfort your car's seats. Large windows allow a comfortable vision, open wide in winter weather. Four Houdaille hydraulic shock absorbers, and the unique Ford

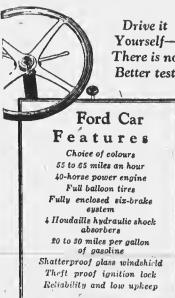

feature of transverse, semi-elliptic springs, give the effect of riding on air.

DEMONSTRATION—Ask your Ford dealer to let you drive a Ford. He will be glad to take you. On some of the steepest hills, the heaviest going—you will be amazed at the power at your command. Head for the busiest streets. Drive alongside other cars. Try the quick gear changes, the quick pickup in second, the easy gearshift. Feel the smooth, sure action of the six brake system.

A demonstration will convince you of the outstanding merit of the Ford car. Drive it yourself; there is no better test.

Also request your Ford dealer to show you the hidden, inbuilt quality features of the car which make it so enduring.

TIME PAYMENT—if you prefer to buy out of income, you will find the authorized time payment plan offered by all Ford dealers most attractive.

Drive it Yourself—
There is no Better Test
